Commander

Commander's Report

What a fantastic event we had in May from the Entertainment Committee! Thank you so much for providing fun venues for our enjoyment. See the pictures from the Luau and you'll see how much fun we had. ***Make your reservations now for the June Cookout***. We'll supply grills and tools, you bring your entrée and cook it the way you like. For more information, see the flier in this edition.

Many of our members have started traveling and won't return until Fall. We wish them safe travels and will be excited to see them return. Our next edition of the Buoys is in September, but everyone can visit our website or facebook page to keep updated on things happening this summer. Our summer office hours are Tuesday, Thursday, and Saturday from 0900 – 1200, beginning June 18th. We will return to our regular office hours after Labor Day. A big thank you goes to our Duty Officers for all they do!

Our Education Department has been busy all year. Check out Lt/C Bob Meier's article for classes and seminars being scheduled. It's always good to challenge yourself and keep your mind active. Let Bob know if there's something you'd like to see offered. Spread the word to your family and friends that our next ABC class begins June 11th. Ted, Bill and Tom will take a well deserved break in July and August, then will be ready to start ABC classes again on September 13th. I'd like to give a big Thank You to all our instructors for sharing their time and talent!

Our next general meeting will be held at the squadron on Thursday, June 14th. Lite Bites will be offered at 1800 (6 pm) and the meeting will begin at 1900 (7 pm). See Lt/C Jill Berger's article for additional information.

Lt/C Steve Parris will return in the Fall, but is currently collecting names of participants for the Oktoberfest and Boat Show Events. To e-mail Steve, or other officers, see their contact information on page 2 of this edition.

Please contact me with any questions or comments. I'd love to hear from you. I'm currently looking for someone to oversee the sale of charts to members. This would involve going into the ABC class to sell charts and track inventory. If you'd like to know more about how you can become involved, just give me a call or e-mail.

Safe boating,

Cdr Marge Maciag
margem5@msn.com
239-471-0101

TO ALL MEMBERS
THE REPORT OF THE AUDIT COMMITTEE FOR THE FISCAL YEAR ENDED FEBRUARY 28, 2018 IS AVAILABLE FOR YOUR REVIEW DURING REGULAR OFFICE HOURS, AT THE SQUADRON OFFICE.
IDA A. RUBIO, CHAIRPERSON

Executive Department

Lt./C Steve Parris, S

As boat owners, squadron members, and residents of southwest Florida you know how important the weather is to boating and other activities. Forecasts from local television stations are not detailed and usually present temperature, precipitation, winds, and humidity. The National Weather Service prepares Marine forecasts four times a day and are available on line.

There are many ways to access the site, the easiest is to conduct a web search on national weather service marine forecast. The national weather service (NWS) produces many weather products. Perhaps the best forecast service for us as boaters is the coastal zone forecasts. The zone forecasts are prepared for all the coastal waters of the United States and out to sea usually 20 to 60 miles. The zone forecasts contain the range of weather conditions that will occur in the entire zone during the forecast valid time.

To access the zone forecast, scroll down the marine forecast page to the link Coastal/Great Lakes and open the link. The link contains a map of the United States with the zone forecast displayed in various colors. The Florida coastal area is outlined in green.You can click anywhere on the green color and a link will open displaying the coastal areas of Florida in various colors. Cape Coral is within the Tampa weather center. Click on the orange color, which represents Tampa, it will display the zone forecasts from the Suwanee River to Englewood Florida. Open the brown area, which represents Charlotte Harbor and Pine Island Sound ,and at the top of the page is a brief description of the general weather conditions within the zone. Opening the "Read More" will display the short range public discussion. This will describe general weather conditions in the United States.

Under marine zone forecasts, the synopsis describes the weather phenomenon that causes the weather conditions contained in the forecast. At the bottom of the page,under additional forecasts and information, is the forecast discussion which is highlighted in blue. The forecast discussion is prepared by the forecaster and is usually a small change to a previous forecast or weather trends the forecaster is observing. The trending reports when they occur can be very valuable. A forecast period may contain weather conditions that would prevent you from boating. If the forecaster sees weather conditions start to improve (a trend), but not enough to amend a forecast, it would inform you if the weather would accommodate safe boating later in the day.

Another valuable tool is the weather observations. It is accessible in the middle of the page by clicking on view nearby observations. Weather observations are the current conditions at the time of the observations. Most are automatic systems. Many of the reporting stations are on buoys and some are onshore. The observations are useful in determining how accurate the forecast is and determining if weather is trending up or down.

The national weather service uses meteorological terms and abbreviations in their forecasts and weather observation reports. A search block on the marine forecast page can be used to find a list of the abbreviations. This seems tedious and it is at first. The more you use the website the easier it becomes. You can also bookmark some of the pages which makes it faster.

The more that you understand the weather phenomenon such as fronts, air masses, causes of thunderstorms, barometric pressure, relationship of temperature and dew point, winds and how these phenomenon react with each other, the better you can analyze weather forecasts and observations.

Safe Boating Everyone

Education Department

ABC class's continue on a monthly basis with Ted Dawson (Lead), Bill Harris and Tom Dawson (assist). June will be the last class until September

Seamanship in May had to be postponed due to low participation. We will try for a June class based on enrollment in May.

Seamanship will be starting on June 11th Dan Patke (Lead)

This will be the last Seamanship class until this fall October

Build boating confidence and competence for safe and fun on-the-water adventures. Seamanship provides a foundation of knowledge and skills in boat handling and maneuvering, boat operation, skipper's responsibilities, and boating techniques that will advance your boating enjoyment.

Advanced Piloting class finished on May 15th Ray Wlodkya (lead) and Rick Clements (assist)

Instructor Development Started May 21th Ray Wlodkya (lead)

Unlike other USPS courses, the Instructor Development course is not designed to enhance boating skills. Rather, its emphasis is on enhancing presentation techniques and instructor skills. The course has been designed to demonstrate interactive teaching methods focused on adult learning. Students are required to prepare lesson plans and give three presentations to their peers utilizing a variety of teaching aids and presentation skills. The instructor may assign a topic for these presentations or you may use material and PowerPoint slides from existing USPS courses, and they may build on one another.

Junior Navigation is scheduled for October 1st Ray Wlodkya (lead)

Subject matter includes:

- Precise time determination
- Use of the Nautical Almanac
- Taking sextant sights of the sun
- Reducing sights to establish lines of position
- Special charts and plotting sheets for offshore navigation
- Offshore navigational routines for recreational craft
- Electronic and computerized offshore navigation

In Junior Navigation, the student will continue to use GPS as the primary position sensor, as they learned to do in Piloting and Advanced Piloting. However, the offshore environment poses many different elements for consideration by the Navigator. Ocean currents, wind, and sea state all affect a vessel's performance over the longer passages.

Also, visible terrestrial landmarks are no longer available to the navigator as reference points. In the Junior Navigation course, the student will learn to substitute celestial objects such as the sun as reference points. The course begins with the study of celestial navigation, teaching the student to take sights on the sun with a marine sextant and derive a line of position from that observation. Next, the student will apply the principles learned in Advanced Piloting, and plot a running fix from two sun sights taken about four hours apart. Once the student has learned the basics of celestial sight reduction, the course continues with planning, positioning, and checking one's position in the offshore environment, using both electronic and celestial tools.

SAIL OCTOBER 10 2018 7 to 9 pm

It has a number of years since we offered this course. CAPT. SEABY lead instructor has many years of sailing experience.

The course starts with basic sailboat designs and nomenclature, rigging, safety, and sail processes and then tackles the physical aspects of sailing forces and techniques, sail applications, marlinespike, helmsmanship and handling of more difficult sailing conditions, navigation rules, and an introduction to heavy weather sailing. Appendices provide an introduction to sailboat racing and sailing in Canadian waters.

This new Sail course is a single volume Student and Instructor Manual (IM) developed in cooperation with the Canadian Sail & Power Squadron. Course instructional materials include material in Microsoft PowerPoint® format with embedded animations that require additional software to perform correctly

Course completion is documented by a closed book exam graded by USPS Headquarters.

Minimum computer requirements for the current version of the IM CD are:

- Operating System: Microsoft Windows XP or higher. Note that Windows Vista has presented difficulty for some users. Instructors should always try out the presentation ahead of class time.

Software: Microsoft Office 2003 (Power Point) or higher; Adobe Flash 10

Continued on next page *********

****

A number of us attended the District meeting educational seminar. Many of changes are coming and we will keep posting changes as they are implemented.

On-The-Water training Randy Headrick (lead) is gaining momentum. If you are new or need a little refresher contact Randy see flyer in the Buoys.

On the Power Squadron web site is a list of Advance and Elective class's if anyone is interested in taking one of these, let us know we will set up a class.
We are looking forward to another great year in education!
SEO Lt./C Bob Meier, SN
****
Last weekend for the Farmer Market was May 12th
From the Power Squadron, Pat and Myself a special Thanks to all that participated. Every Saturday for eight months is a real commitment. We had Five great teams to cover so one weekend a month was the norm but some covered more and all were great.

SEO Lt./C Bob Meier, SN

Administrative Officer

Lt./C Jill Berger, S

Administrative Officer report - May

Hello Florida friends. I have flown north for the summer, but you can still reach me if needed. I will be boating and fishing at Rough River in Kentucky, cruising the Rhine, Main and Danube Rivers in Europe and white -water rafting in Maine. Can you tell I love boating and the water?

Volunteers Needed for Lite Bites in September. Lite Bites is a simple meal served prior to our general meeting each month. As suggested, it is a lite, simple meal prepared and served by volunteers. There is a budget for the meal so it does not cost the hosts any money, only time. The club provides paper products. If you would be willing to host a Lite Bite meal, please contact Bev Parris, 502-876-8815 or bevparris629@gmail.com.

Fishing Group had about 25 folks turn out for the May meeting to hear Mike Shelton of Big Boys Bait and Tackle give a fishing report and answer questions about bait fishing techniques. The next meeting is June 12, at 7 pm., speaker TBA.

The Kayakers met a week later than usual, on May 22, for an outing at Matlacha Park .

Cruise and Rendezvous group just returned from their two-week trip. The cruise this year took them north to Tampa with stops at 4 marinas. Their next adventure will take them to Aqua Marina Palm Harbor, June 11-14.

Weekend Boaters had to postpone, then cancel their outing in May due to inclement weather. The June meeting and outing are expected to occur as planned. Be sure to attend the meeting on June 11 at 7:00 p.m. if you wish to participate in the outing.

Entertainment Committee hosted a Luau Party in May. See pictures in this issue of the Buoys. I am sorry I couldn't attend, but I hope you did! Be sure to sign up for the Summer Grill Out Party on June 22! Look for details in this newsletter.

If you would like to be a part of this party-planning group, contact Warren Maciag. The group meets the first Tuesday of every month at 9:30 a.m.

Coming up!

The June general meeting will be held on Thursday June 14. The speaker will be John Gunter, District 1 City Councilman. Cape Coral is undergoing some big changes. Find out the latest on the golf course project, road repairs and repaving, and other current issues.
Don't forget to bring your most burning questions, too!

District Commander Don Cook has planned a D22 member's outing at the Tampa Bay Rays Baseball Stadium at Tropicana Field.

On Sunday, 24 June the Rays play the New York Yankees at 1:10 PM - gates open at 11:40 AM.

Tickets are $49.00 and include a Rays Hat. Group seating is on the lower level near 3rd base.

Please see the attached flyer for ticket contact information. Don't forget to mention you are a Power Squadron Member when purchasing your tickets.

D/C Cook will send out further information on possible carpooling and a pre-game tailgate gathering.

WELCOME…….

C&R, Weekenders, Kayak Group, Fishing Group, Scuba are groups within the Cape Coral Sail and Power Squadron. You don't need to join in the activities of just one group. You may have a day boat and figure that the C&R is only for sleep -aboard boats. Not true!!! There are some cruises where members stay in the available lodging such as T'ween Waters, South Seas, Pink Shell. or drive over for the day. There are also monthly luncheons with the C&R just a short drive or take your boat. It's a great way to meet up with friends, learn the local waterways and try out some new restaurants.
The Weekenders usually have an informational meeting each month followed by a Saturday cruise to a local restaurant. Even if you don't have a boat, you can still attend the meeting and make sure you are receiving their email blast about the upcoming trip. You may drive your car to the restaurant or maybe able to go on someone elses boat.
Don't have a kayak? The kayak group usually meets at a location where you can rent a kayak. What better way to learn than with a bunch of safety minded boaters.
You will find contact information throughout this newsletter. If you want to learn about fishing in the local waters, get in touch with the fishing group. Same with Scuba, just make contact to explore what the Squadron has to offer. Feel free to attend the meetings for any group.

D/22 C&R to Little Harbor

Clarification for those who wish to arrive by boat.

First – Tommy is the right person to ask for at 813-645-2288. If it is more convenient people can email him at lhmarina@tampabay.rr.com

You must be ready to provide all of your information. LOA – power needs – water – time/day in –time/day out – draft – beam - preference Port or Starboard tie.

There are 2 Marinas and a Sea Wall that are used for dockage.

1 - For those who want to bring their boat but stay in a rented room (Harbor Side) and (Little Harbor INN) (LHI - may be sold out) they get a free slip along the Sea Wall. To get that slip however they must call the (Dock Masters) office ask for Tommy and he will assign you a slip. You must supply him with your room reservation number. The depth along the Sea Wall is 3-5 feet only.

2 – Village Marina – This is the first Marina they will assign slips to on a first come first serve basis for overnighters.

3 – Antigua Cove – This is the furthest away Marina and it is about a 10- 15 minute walk to the restaurant. You will know this location because of the high rise inside storage building.
Tommy will use this Marina for back up once he runs out of slips at Village Marina. Between Village Marina & Antigua he hopes to have about 25 slips available.

They are asking that we wait till **August 1st.** to start making **slip reservations**.

4 – When heading to Little Harbor coordinates are Lat/Lon – 27°43.583'N/ 082°28.517'W
Harbor Master monitors channel 16 then will ask you to go to channel 72.

ONCE YOU MAKE YOUR RESERVATION FOR A SLIP PLEASE DROP BUD LOMASTRO AN EMAIL ADVISING HIM – suebudfl@verizon.net

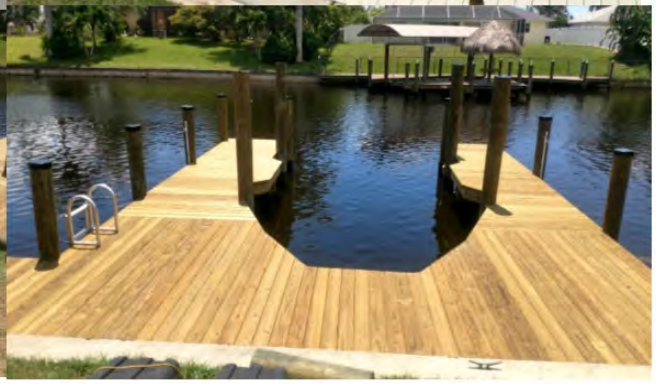
Materials and Structure



In an effort to keep our facility ready for parties and health inspectors we would like to put a few teams together to work on our kitchen. 2-3 people per team would work well. Time involved would be 2-3 hours per cleaning.
We would like to schedule clean-ups twice a month, dates and times are flexible. The more volunteers we get, the fewer times a team will be on the rotation.
Please send your name and contact information to me ASAP.
Feel free to form a team and let me know you would like to work together.
It's also a good way to earn Merit Mark Credit.
Thank you in advance for any assistance you can provide.

for our members

ARE YOU ON FACEBOOK? CHECK OUT OUR NEW PAGE. LOOK US UP BY ENTERING CCSAPS IN THE SEARCH BAR TO BRING UP AMERICA'S BOATING CLUB, CAPE CORAL SAIL AND POWER SQUADRON. PLEASE LIKE THE PAGE TO FOLLOW.

Life Jacket Loaner Program

This program is a valuable public service.
Please pass the word among your boating friends
that lifejackets are available to
borrow at the Squadron,
at no cost, for visiting
children or grandchildren.

AMERICA'S BOATING CLUB
For Boaters, By Boaters

WEEKEND BOATERS (The Weekenders)

The 'Weekenders' are members of the CCSAPS who take lunch trips by boat to various on-the-water restaurants on Saturdays (for those who can't go during the week).
Our 'follow me' trips are a great way to learn the local waters and practice safe boating.
The planning meetings are held on the Monday evening before the Saturday trips. These planning meetings offer additional boating instruction and great conversation. Come join us. Let's talk!
Please look for our meeting dates on THE BUOYS calendar.

NEXT MEETING: MONDAY AT 7PM TO PLAN TRIP
FOR SATURDAY

Squadron 'Help Wanted'

Certified Vessel Inspectors
Complete short training course
Inspect vessels for safety and place CG sticker
Contact: Peter Perry
pjamesp41@comcast.net

Farmers Market (Saturdays)
Talk to the public about CCSAPS
Promote ABC Class, sell charts
Contact: Bob Meier
rmeier5157@yahoo.com

Lite Bites
Prepare simple, light meals before General Meeting
Contact: Bev Parris
bevparris629@gmail.com

Event Setup
With other team members, set up and take down chairs, tables (about once a month)
Contact: Ralph Cobourn ralphcobourn@yahoo.com
Rick Clements retiredrick@yahoo.com

Entertainment Committee
Help in kitchen and hall, setting up for monthly dinner/social events
Contact: Warren Maciag
warrensm@msn.com

Building Maintenance
Are you handy? Rick can use some help around the Squadron Building keeping things going.
Call if you can help out on some Projects.
Contact Rick Clements retiredrick@yahoo.com

If your group needs help, send me the info and I'll include it here.
Gerry Whisler gwhisler@msn.com

Need a Burgee for your Vessel? License Plates? Caps?

You get the picture! See Delores Buhner for your CCSAPS Logo items

CCSAPS Lift Exchange Program

Do you have a boat lift you aren't using?
How about renting it to another Squadron Member?
Would you like to rent a lift for your boat?
If you're in either of these groups,
Contact Squadron Harbor Office
239 549-9754
